CRRSA Act

(Coronavirus Response & Relief Supplemental Appropriations)

\$1.7 trillion

Use of Funds:

High Quality Assessments

Azi's patented technology allows students to quickly and independently complete accurate, adaptive assessments. Both grade and age levels are identified to help teachers successfully guide instruction.

Evidence-based Activities

Indexed, evidence-based activities provided. **ESSA Strong Evidence.** What Works Clearinghouse and 7 successful, randomized controlled trials. No one has more evidence. We've proven to achieve over 90% of students reading at or above grade level by the end of 3rd.

Information & Assistance to Families

Learning Oventions provides Reading Check-Up for parents. Assessments and activities are generated so that parents maintain consistency with what's happening at school. Evidence based activities ensure the work that parents are doing with their children is meaningful and constructive.

-  **Deadline for Awards is January, 2022**
-  **Funds Obligated by September, 2023**

Use of Funds:

ARP Act
(American Rescue Plan)
\$1.9 trillion

● **Summer Learning & Enrichment**

● A2i Summer uses patented software to quickly identify grade and age levels of children. Lesson recommendations are provided so all children get what they need - including those who need enrichment above grade level.

● **Extended Day & Extended Year**

● A2i provides after school and tutoring options that mirror tasks children do in school. This provides consistency for adults working with students and stability for children.

● **Interventions respond to students' academic, social, & emotional issues**

● Small group instruction provides daily opportunities for students to build relationships, positively interact with classmates, and improve social skills. The ability to read by third grade dramatically increases student chances for future success and equals the playing field for all.

● **Professional Development**

● Learning Ovation establishes a 3-year partnership with schools to ensure fidelity and success. Literacy Outcomes Specialists provide customized PD for teachers and administrators, support teachers in providing individualized learning for students and are available on-demand.

How can schools and communities use federal Covid Relief Funds to recover learning loss and improve early literacy outcomes?

All COVID relief bills, including the American Rescue Plan ask schools and communities to use funds for the following learning loss recovery activities:

1	Addressing Learning loss among students (including low-income, children with disabilities, English learners, racial and ethnic minorities, homelessness, foster care, etc).
2	Administering high-quality assessments (to meet needs including differentiated instruction).
3	Implementing evidence-based activities.
4	Planning and implementing activities related to summer learning and afterschool programs.

How can schools and communities use federal Covid Relief Funds to recover learning loss and improve early literacy outcomes?

All COVID relief bills, including the American Rescue Plan ask schools and communities to use funds for the following learning loss recovery activities:

1 Addressing Learning loss among students (including low-income, children with disabilities, English learners, racial and ethnic minorities, homelessness, foster care, etc.

Learning Ovation has been shown equally effective across all demographics: ethnicity, gender, and socio-economic status. Part of the original research was to ensure that the impact of A2i Professional Support System benefited ALL students. This focus continues to be a central pillar of our work. In 70% of schools studied, 75% of students qualified for FRPL (18,260 students), 23% of our schools had 50% of students qualified as Limited English Proficient Learners and 79% of schools qualified for Title I. Overall, 77% of our schools were identified as high minority (less than half white). This demonstrates not only that A2i instruction improves reading outcomes for all students, but that Learning Ovation can be instrumental in **closing the achievement gap.**

How can schools and communities use federal Covid Relief Funds to recover learning loss and improve early literacy outcomes?

All COVID relief bills, including the American Rescue Plan ask schools and communities to use funds for the following learning loss recovery activities:

2

Administering high-quality assessments (to meet needs including differentiated instruction).

The A2i assessments are normed to the NAEP with validity and reliability derived from the Woodcock Johnson gold-standard literacy test protocols. Technology allows for a quick, adaptive assessment to determine both grade and age equivalency. This information is used to guide schools, community providers, and parents to evidence-based assignments which provide ongoing, differentiated and individualized work that addresses the unique needs of each child.

How can schools and communities use federal Covid Relief Funds to recover learning loss and improve early literacy outcomes?

All COVID relief bills, including the American Rescue Plan ask schools and communities to use funds for the following learning loss recovery activities:

3 Implementing evidence-based activities.

A2i is informed by fourteen years of research funded by the US Department of Education and NIH and is rated **Strong by Evidence for ESSA** and the What Works Clearinghouse. Learning Ovation's software is indexed with only evidence-based lessons and activities. Included in the software are evidence-based ELA curriculums (we will index your district curriculum if not already available in the software), open-source activities and materials, and hundreds of other lessons that fill in skill gaps to complement and support your curriculum.
